

SHL Release notes

03 February 2023

Candidates can upload MAC (.pages, .keys, .numbers) file extension on Business Simulation platform

What is this change?

This feature is an enhancement of the existing feature which allows candidates to upload documents in the simulation/preparation exercises (currently we allow MS office documents, open office documents).

With this enhancement, the candidate will be able to upload MAC file (.pages, .numbers, .keys) extensions in the document hub while attempting the Business Simulation exercises.

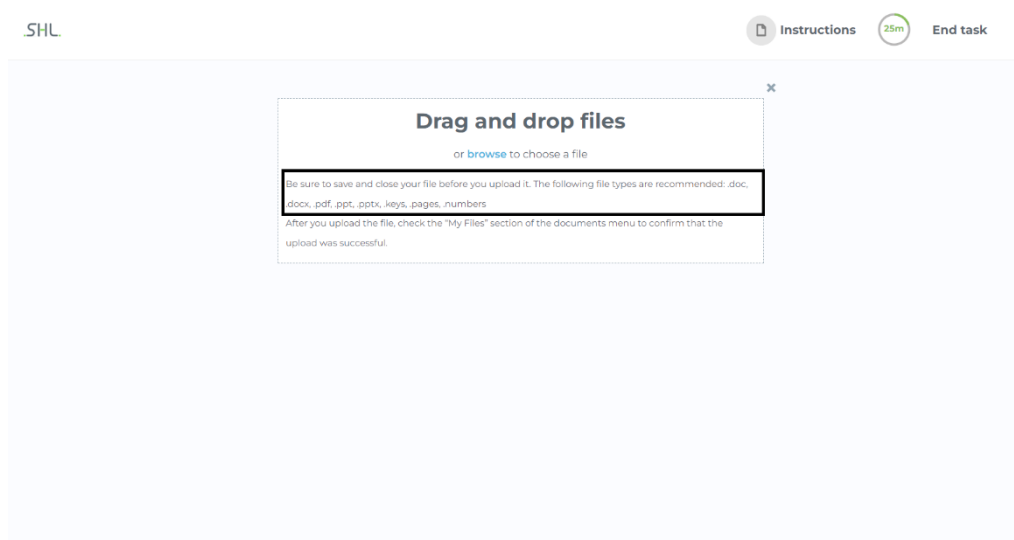

Why did we bring this change?

There were many requirements from the customers of Business Simulation to support to upload MAC file extensions in simulation/preparation exercises as many candidates use MAC devices to give test. To accommodate this requirement, this enhancement is done.

What is the customer impact of this change?

There will be no impact on customers. This feature is a product offering and the enhancement is done to improve the candidate experience.

What does this change look like?

Rescheduling Live Meeting part of the Business Simulation Exercise when Preparation/Simulation part of the exercise is started/completed

What is this change?

This is an enhancement of the existing rescheduling feature available for Business Simulation exercises.

With this change the admin user will be able to reschedule the live meeting part of the exercise even if the preparation/simulation part of the exercise is started or completed.

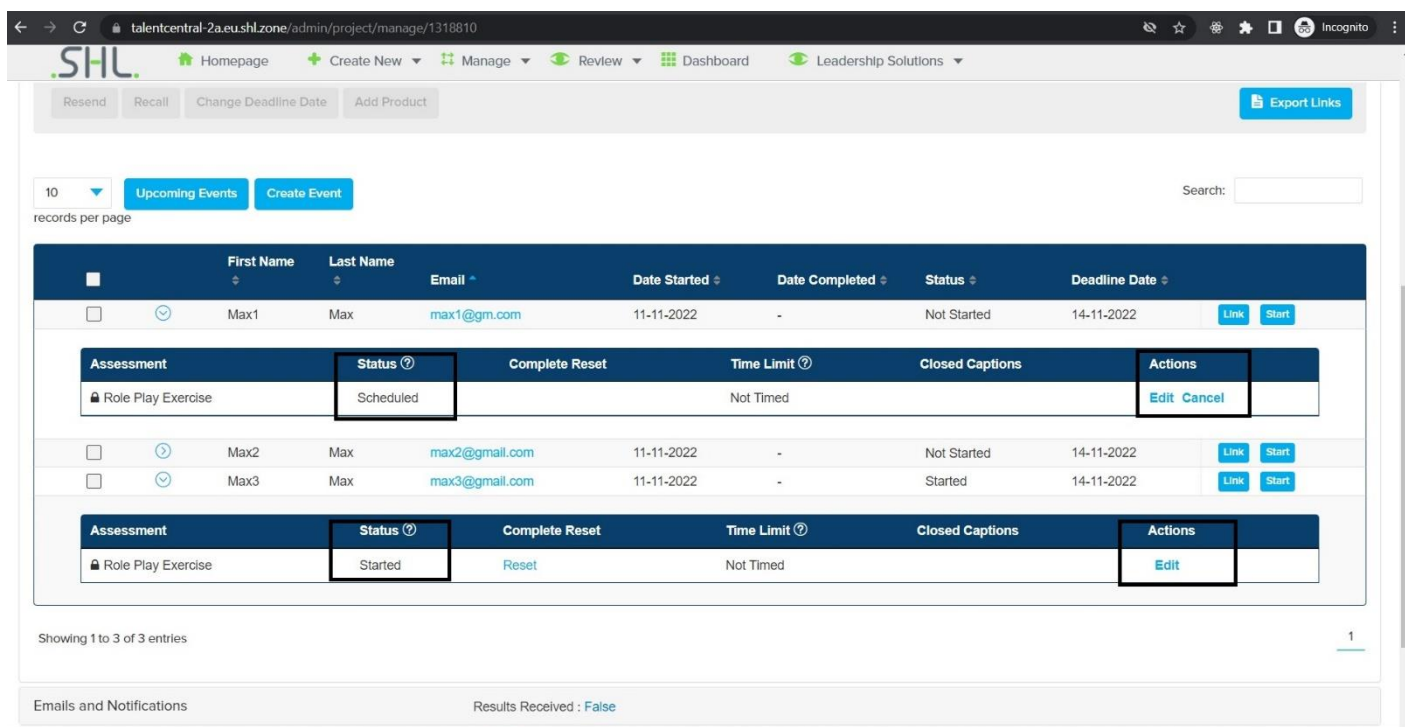

Why did we bring this change?

There were many cases reported where the candidates have started or completed the preparation part of the exercise and recruiters were unavailable for the scheduled interview/meeting time, in this case the only option was to create a new project with updated meeting time. But with this approach the candidate's progress on preparation part was lost. To resolve this issue, we have done development in the rescheduling feature available for all **multi-task/two-part** exercises.

What is the customer impact of this change?

There will be no impact on customers. This feature is a product offering and the enhancement is done to improve the candidate as well as the recruiter experience.

What does this change look like?

The screenshot shows the SHL Talent Central admin interface. The top navigation bar includes 'SHL', 'Homepage', 'Create New', 'Manage', 'Review', 'Dashboard', and 'Leadership Solutions'. Below the navigation bar, there are buttons for 'Resend', 'Recall', 'Change Deadline Date', 'Add Product', and 'Export Links'. A search bar and a dropdown for 'records per page' (set to 10) are also visible.

The main content area displays a table of exercises. The table has columns for 'First Name', 'Last Name', 'Email', 'Date Started', 'Date Completed', 'Status', and 'Deadline Date'. There are three entries in the table:

First Name	Last Name	Email	Date Started	Date Completed	Status	Deadline Date
Max1	Max	max1@gm.com	11-11-2022	-	Not Started	14-11-2022
Max2	Max	max2@gmail.com	11-11-2022	-	Not Started	14-11-2022
Max3	Max	max3@gmail.com	11-11-2022	-	Started	14-11-2022

Below the table, there are two detailed views of the 'Role Play Exercise' assessment. The first view shows the 'Status' as 'Scheduled' and the 'Actions' as 'Edit' and 'Cancel'. The second view shows the 'Status' as 'Started' and the 'Actions' as 'Edit'.

At the bottom of the page, there is a footer with 'Showing 1 to 3 of 3 entries' and 'Results Received : False'.
