New Interface Languages Added on TalentCentral+ : Norwegian, Dutch, Swedish, French, and Italian

We're excited to announce the addition of five new interface languages, including Norwegian, Dutch, Swedish, French, and Italian, to TalentCentral+. With these additions, TalentCentral+ users can easily switch languages, navigate through the platform, and send email communications to participants and recruiters in these new languages.

The localised templates can also be scheduled for participants, evaluators, proctors and admins. The rest of the behaviour remains the same on platform.

Participant and recruiter interface languages -

In conclusion, we are excited to share that our diverse range of participant experience languages include Czech, Danish, German, Greek, English (International & US), Spanish (Spain & Mexico), Finnish, French (Canada & France), Hungarian, Italian, Japanese, Korean, Lithuanian, Latvian, Dutch (Belgium & Netherlands), Polish, Portuguese (Brazil & Portugal), Romanian, Russian, Slovak, Swedish, Thai, Turkish, Simplified and Traditional Chinese, French (Belgium), Icelandic, Bosnian, Macedonian, and Albanian. Recruiters also benefit from a tailored interface available in English (US), Chinese, English (International), French (Canada), Japanese, Italian, French, Norwegian, Swedish, and Dutch. These additions ensure a more inclusive and engaging experience for all users across diverse cultural and linguistic backgrounds.

Candidate Experience: Enhanced Device Testing Screen

We are excited to announce that we have consolidated camera, microphone and speaker device testing screens into one single screen. This will allow candidates to check device compatibility on one screen rather than naviagting across multiple screens.

This update focuses on enhancing the usability and functionality of the device testing screen to provide a more streamlined and efficient testing experience for candidates.

Key Enhancements:

- Improved User Interface (UI):
 - We have redesigned the user interface of the device testing screens to be more intuitive and visually appealing.
 - With consolidation, candidates will be able to save time in assessment workflow by quickly testing all camera, microphone, and spaker in one single screen.
- Configurable Screen:
 - This new screen is configurable such that camera, microphone and speaker testing funcationalities can be be turned on/ off based on the client request to SHL.
